Thimmapur Nagateja Goud

+91 6305782425 | thimmapurnagateja8185@gmail.com | nagateja8185 | thimmapur-nagateja-goud8185

OBJECTIVE

Computer Science Engineering student specializing in Information Security with hands-on experience in Artificial Intelligence, Machine Learning, and Cyber Security. Skilled in developing phishing detection, network anomaly detection, and secure file-sharing systems using Python, TensorFlow, Scikit-learn, and SQL. Seeking internship or entry-level opportunities to apply technical expertise in AI-driven security solutions, threat detection, and software development.

EDUCATION

Vellore Institute of Technology, Vellore — Aug 2023 – Jul 2027
B.Tech in Computer Science Engineering (Information Security) — CGPA: 7.96/10

Resonance Gurukul Campus, Telangana — Jun 2021 – May 2023
Intermediate Education (MPC) — 832/1000

SSR Discovery Academy, Telangana — Sept 2019 – Aug 2021
Secondary School Education — 391/500

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL
Tools: Git, GitHub, VS Code, Jupyter Notebook
Core Subjects: DSA, Operating Systems, DBMS, Computer Networks
Soft Skills: Problem Solving, Attention to Detail, Analytical Thinking, Continuous Learning

PROJECTS

MalwareVision – Explainable AI-Powered Hybrid Malware Analysis and Threat Intelligence Platform GitHub

- Built an **AI-powered hybrid malware analysis platform** combining **static and dynamic analysis** to identify malicious files, suspicious behaviors, and potential security threats.
- Developed an **explainable ML-based detection system** using **Python, Scikit-learn, and SHAP**, with automated threat intelligence enrichment and interactive analysis dashboards.

SafeTalk.ai – Explainable Behavioural Cyber Harassment Detection GitHub

- Built an **AI-powered cyber harassment detection system** using **BERT, RoBERTa, and DeBERTa** models to identify grooming, bullying, coercion, and sextortion from conversational behavior.
- Implemented **multilingual NLP, conversation memory, emotion detection, behavioral risk scoring,** and **SHAP-based Explainable AI** for context-aware threat detection and early intervention.

SteganoSafe – Secure File Sharing System GitHub

- Designed a secure file-sharing system combining **AES-256 encryption** and **image steganography** for confidential data transfer.
- Implemented **RBAC, audit logging, secure authentication,** and hybrid steganography techniques using **Python** and **SQLite**.

INTERNSHIP EXPERIENCE

Artificial Intelligence & Machine Learning Intern — May 2025 – Jun 2025
Elythra Edufyi Tech Solutions, Bangalore

- Worked on **data preprocessing, exploratory data analysis (EDA), and machine learning model development** using **Python, Pandas, NumPy, and Scikit-learn**.
- Implemented **Linear Regression, Logistic Regression, Decision Trees, and K-Means Clustering** on real-world datasets for **regression, classification, and clustering tasks**.
- Performed **data cleaning, feature engineering, feature scaling, and model evaluation** using metrics such as **Recall, Accuracy, Precision, F1-Score** to improve predictive performance.
- Developed a healthcare analytics project titled **"Health Chatbot Using Machine Learning"** for predictive analysis and risk assessment.

CERTIFICATIONS

- IBM Data Analysis with Python – IBM Cognitive Class
- EDUFYI TECH SOLUTIONS – INTERNSHIP Completion Certificate
- IBM SkillsBuild – INTERNSHIP Completion Certificate
